

Help Us Protect Your Drinking Water

The United States Environmental Protection Agency (EPA) Lead and Copper Rule Revisions (LCRR) require municipalities to inventory water service lines on both the water system side and customer side and to provide a report to the Pennsylvania Department of Environmental Protection (DEP) by October 16, 2024. Therefore, the borough requests your assistance in completing an important survey to document the material of your water service line from the water meter to just outside of your home or business. The inventory will help identify and prioritize the replacement of high-risk materials that could potentially be a source of lead in drinking water. Results of the survey may allow the borough to obtain grant funding to replace water service lines at no cost to you.

Please answer all questions and submit the survey to the borough via email at info@westreadingborough.org, text message to 484-869-5025, mail, drop box, or in person at your earliest convenience.
